Floral enthusiasts have found that the Hemerocallis belongs in the garden, not to replace the spring bloom of Iris and Peonies or the fall blooms of the lovely Chrysanthemum, but to fill in that much needed mid-summer bloom. Day by day this beautiful flower is becoming more and more in demand. Hardy from coast to coast and one that will thrive in any garden soil. We send our customers only soil grown Chrysanthemums. Rooted cuttings are sent out only in emergency when a certain variety exceeds our soil grown supply. This early in the season, IRIS seem inappropriate to list but you will find many new ones in our 1951 catalogue.
